\$350.00 per 1000

For Greenhouse forcing, for planting in gallon cans, or for selling as Perennial Clumps.

If grower has his own cold storage they can hold in storage at 30 degrees, not over or under. 30 degrees is the temperature eggs are stored at and it should be easy to find local storage and then the grower can draw them out as needed.

For Greenhouse forcing they should be planted in 6" pots. If the roots are too large for 6" pots they can be cut down to fit without hurting their forcing qualities.

It takes 90 days forcing time for stock that has not been in cold storage and 70 days for stock that has had cold storage treatment. November and December shipments will be shipped without storage. January and February deliveries will be shipped out of cold storage.

RED WING

U. S. Patent No. 1159

We believe this variety will replace Hexe because it grows about 40% faster, it has more attractive color and the flower is larger. Red Wing is considered the best of any patented or unpatented azalea on the market.

CARDINAL — SCARLET

U. S. Patent No. 1175

Similar to Red Wing in color of flowers, Cardinal has smaller hose-in-hose blooms. Its growth habit is much more compact than the Kurumes.

ECSTASY — WHITE

U. S. Patent No. 1157

This hybrid tends toward the Belgian Indicas in flower, foliage, and plant habit, although it is more compact, much hardier, and easier to grow than the true Indicas. The double, high centered flowers, up to 4¼ inches across, are white, often striped or dashed with orchid, and have yellow-green markings in the throat. The foliage is light green and glossy.

MELODY — FUCHSIA PINK

U. S. Patent No. 1158

Another Indica type plant, Melody has a more compact habit of growth and very dark green, thick, glossy foliage. The fuchsia pink flowers are similar to the Kurume, being hose-in-hose—that is, with one flower inside of another—but they have the size and flat opening habit of the Indicas.
